Re: Price quote for Point Clark Lighthouse Museum (PCLM) Revitalization – Phase 3

Dear Amy,

Blue Rhino Design can provide management and coordination services for the fabrication and installation of the exhibit display cases, museum furniture, multimedia equipment and graphics. A breakdown of the cost for our services is provided below (all dollar amounts are prior to the application of HST).

Item	Amount
Review of Working Drawings	\$500.00
Final Prep & Review of Graphics and Video	\$500.00
Selection and/or design of artifact stands	\$300.00
Shop visits (3) including pre-delivery inspection	\$800.00
Project Coordination	\$900.00
Total	\$3,000.00

This quote assumes that the Township would manage the financial and contractual relationship with the exhibit fabricator and install the artifacts in their cases. We can provide these services so process is a turnkey one for the Township at the additional prices below:

Item	Amount
Contracting of fabricator and contract management	\$900.00
Installation of artifacts / objects	\$500.00

The above pricing assumes that the Township will have the lighthouse keeper's house prepared for installation (i.e., walls painted, lighting installed) and that there will be a representative of the Township present at the end of the installation to inspect the work and provide sign-off.

Please let me know if you have any questions about this quote. Thank you.

Best regards,

Steve Karpik
