Discussion:

Annual Landfill Monitoring Reports

The most significant item to note from these reports is the project closure date for the Huron Landfill is now March 2031. This is mostly attributed to the declining volumes that are being landfilled since peaking in 2018. Township staff are planning to undertake a more detailed survey of the site this fall to obtain a more accurate site capacity estimate, however. We have also started discussions with our landfill engineer regarding options that will increase the capacity of the Huron Landfill without expanding the approved area. More information will be coming forward at a later date.

Financial Impacts:

Landfill operations are included in the Operating Budget.

Performance Measurement:

Various aspects of landfill operations are being tracked annually, such as tonnes diverted from the landfill and volume of landfilled waste.
