May	42	6
June	47	7
July	45	8
August	44	4
September	63	8
TOTAL	242	38

*includes completed and currently scheduled appointments to the last day of September

In preparation for the 2021 septic inspection program, B.M. Ross sent 300 letters in April to property owners who had systems inspected in 2013 (Cycle 1) and due to be re-visited in 2021. Seventeen of those properties are located in the Wellhead Protection Area (WHPA) and require an inspection every 5 years, to date, three properties are outstanding and have had a reminder letter mailed out to them, as well as an additional attempt to reach by telephone.

A summary of the inspections indicates that we have visited 75% of the above properties or have inspection appointments booked before the season ends on October 31st. The bookings for October are currently light, but as in previous years we will begin calling landowners due in 2022 to offer early inspection if it better suits their schedule better.
