Hello Emily,

I am unable to attend the meeting about the Clark Creek Drain on Monday as I have an Ag. Society meeting that night as well. I have a question and I would appreciate it if you could pass it along to the engineer and Council.

I am concerned about the estimated construction costs as presented in the report. I believe these costs have been significantly underestimated, as they were in previous versions iterations of this study. Should tenders come in with costs that are over and above the estimate cost, will property owners be consulted, as ultimately it is us who are footing the bill. Will there be a future opportunity to raise concerns with Council if the project comes in over budget?

Thanks very much,
Ian Courtney
