Dear Members

Please see the letter sent yesterday to Minister Lametti and Minister Mendicino regarding Federal Bail Reform from Chair Patrick Weaver and Executive Director Lisa Darling.

Dear Minister Lametti and Minister Mendicino,

“The need for evidence-based bail reform”

On behalf of Chair Patrick Weaver and Executive Director Lisa Darling, please accept this letter as formal endorsement by the Ontario Association of Police Services Boards, for the legislative proposals for bail reform advanced to you by the Toronto Police Services Board on May 25, 2022.

Kind regards,

Holly Doty, CMP

The Honourable Marco Mendicino
Minister of Public Safety
Confederation Building, Suite 203
House of Commons Ottawa, Ontario
K1A 0A6

Dear Minister Lametti and Minister Mendicino:

RE: SUPPORT FOR REQUESTS BY TORONTO POLICE SERVICES BOARD RELATED TO FEDERAL BAIL REFORM

“The need for evidence-based bail reform”

Please accept this letter as formal endorsement by the Ontario Association of Police Services Boards, for the legislative proposals for bail reform advanced to you by the Toronto Police Services Board on May 25, 2022.

The requested legislative changes communicated to you by Toronto Police Services Board Chair Jim Hart and Executive Director Ryan Teschner are both thoughtful and measured. The comprehensive report provided to them by Chief of Police, James Ramer, outlined the significant collaborative initiatives within the city designed to prevent gun violence through proactive interventions and improved investigative outcomes. It also acknowledged the small portion of the population where proactive and early intervention strategies have proven to be unsuccessful in deterring their engagement in violent gun crimes. It is in response to this high-risk segment of the population that the Toronto Police Services Board seeks changes to federal legislation that would;

- Require that Bail Hearings for the most serious firearm offences be heard by a judge of the Ontario Court or Superior Court, clearly conveying Parliament’s view of the seriousness of these offences (and their impact on the public) as well as reflecting the views and concerns of the public about these incidents
- Add an additional route to First Degree Murder under Section 231 of the *Criminal Code*, by including death resulting from the discharge of a firearm in a congregate setting; this would act as a strong deterrent, clearly express society’s disapprobation of such conduct and help

- maintain public confidence in the justice system; and
- Increase parole ineligibility to 2/3 of an individual's custodial sentence, for any offence where the court finds that the offender discharged a firearm in a congregate setting (including those who are found to be parties to such offences).

We recognize that the complexities of the issues impacting community safety and wellbeing require a collaborative multi-sector commitment to be successful. This is no exception. Emergency services, community services, health services, local councils, provincial governments and the federal government need to recognize the crucial role each plays in the collective effort to make each of our communities safe.

Toronto Police Services Board is asking for this reform, because the tools currently available to the police and their partner agencies have been in-effective at preventing tragic events within the city. We applaud the Toronto Police Services Board and the Toronto Police Service for their leadership on this issue. This issue is not isolated to the City of Toronto, it impacts all communities.

As the leading voice for police governance in Ontario, we encourage you to prioritize the Toronto Police Services Boards proposed legislated changes related to Federal Bail Reform.

Yours truly,

Patrick Weaver
Chair, OAPSB

Lisa Darling
Executive Director, OAPSB

Safety is everything

Message from the President and CEO

At the Nuclear Waste Management Organization (NWMO), safety is our first and highest priority. It drives everything we do – from project design, engineering and environmental research, to aligning with Indigenous Knowledge and engaging local communities.

Over this past quarter, we have taken significant strides forward to confirm the safety of Canada’s plan to contain and isolate used nuclear fuel in a deep geological repository.

The stories presented below speak to a number of ongoing studies that are establishing the safety of the project. As we move towards site selection and beyond, these ongoing studies will help ensure that potential host communities understand all the factors they need to make an informed decision about partnering with the NWMO.

Sincerely,

Laurie Swami

nouvelles de la sgdn

La sûreté avant tout

Message de la présidente et chef de la direction

À la Société de gestion des déchets nucléaires (SGDN), la sûreté est notre première et plus grande priorité. Elle sous-tend tout ce que nous faisons – depuis la conception du projet, l'ingénierie et la recherche environnementale jusqu'à l'alignement avec le savoir autochtone et à la concertation avec les collectivités locales.

Au cours du dernier trimestre, nous avons fait d'importants pas dans la confirmation de la sûreté du plan canadien de confinement et d'isolement du combustible nucléaire irradié dans un dépôt géologique en profondeur.

Les articles présentés ci-dessous portent sur un certain nombre d'études que nous menons actuellement pour établir la sûreté du projet. À mesure que nous avançons dans la sélection d'un site et vers la prochaine étape de nos travaux, ces études continues contribueront à faire en sorte que les collectivités hôtes potentielles comprennent tous les facteurs nécessaires pour prendre une décision éclairée quant à l'établissement d'un partenariat avec la SGDN.

Sincèrement,

Laurie Swami

La SGDN publie des rapports *Confiance dans la sûreté* pour les régions hôtes potentielles du futur dépôt de combustible nucléaire irradié

Welcome to Bruce Power's Municipal eNewsletter

Welcome to our first quarterly eNewsletter for Municipal stakeholders in Bruce, Grey and Huron Counties.

The intent of this eNewsletter is to continue to foster our relationship while helping to keep you informed on some of the key initiatives and activities that we are working on at Bruce Power and in your communities.

If you do not wish to receive this newsletter, please unsubscribe at any time and as always, please reach out to us with any questions or comments.

Thank you,

John Peevers,
Director, Community and Media Relations and Economic Development
John.peevers@brucepower.com

Residents support what we're doing

Residents of Bruce, Grey and Huron counties continue to have confidence that Bruce Power operates safely, is involved with the community in a positive way, and agree that Bruce Power is a strong community citizen.

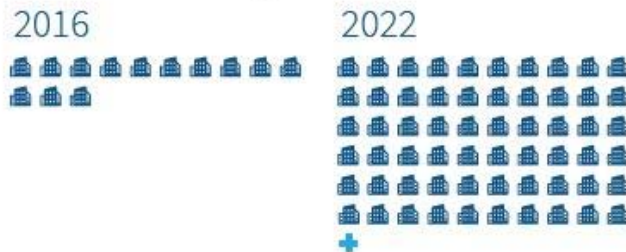

Nearly all respondents (94%) continue to have confidence that the nuclear facility operates safely, feel that Bruce Power is involved with the community in a positive way (92%), and agree Bruce Power is a good community citizen (92%). Eight in 10 residents feel familiar with Bruce Power and 86 per cent of those residents have a favourable impression, saying they feel 'excellent,' 'very good' or 'good' about the company.

We all win.

Local supply chain

Since 2016, the Clean Energy Frontier has grown from 13 suppliers to more than 60 today—across 14 communities in our region.

Clean Energy Frontier driving our economy

The largest export from Bruce, Grey and Huron counties is the electricity that powers homes and businesses across the province and is helping to boost our local economy. A recent economic impact assessment by Jupia Consultants, Inc., showed that the nuclear energy production sector is a major contributor to the success of the regional economy.

Leading the journey to Net Zero

We're committed to helping Ontario and Canada reach their climate change goals, with a destination of Net Zero greenhouse gas emissions by 2050. We believe these goals are attainable and we've laid out our Road Map to Net Zero, which shows how Bruce Power and the Clean Energy Frontier region of Grey, Bruce and Huron Counties can do their part.

Homegrown innovation Isotope Production System to supply world with life-saving medical isotopes

A first-of-its-kind Isotope Production System continues to progress towards commercial, industrial-scale production of medical isotopes for cancer therapeutics. An international collaboration between Bruce Power, Isogen (a Kinectrics and Framatome company), and ITM Isotope Technologies Munich SE (ITM), recently marked the first instance lutetium-177, a short-lived medical isotope, has been produced in a commercial nuclear power reactor.
